Profile

Back-End Developer with a passion for learning new technologies and solving complex problems. A strong team player with excellent interpersonal skills, experienced in infrastructure, improving system modularity and reusability, and thriving in dynamic team environments.

Work Experience

Pango, Full Stack Developer

Nov 2021 – Jan 2024

- Full-stack developer with hands-on experience building internal tools, backend systems, and working in Agile environments.
- Contributed to multiple projects across the stack using .NET, SQL, and cloud services, while continuously improving system reliability and modularity.
- Participated in backend services handling high-load operations like billing and user registration flows, using AWS Lambda, .NET, SQL Server, MySQL, MongoDB, SQS, and SNS.
- Developed internal tools for back-office teams, including web-based reporting features built with Angular and .NET C#.
- Built a Python-based prototype for a real-time bus station monitor, integrating with the Ministry of Transport's (MOT) API to display live arrival data.
- Led communication with "Moovit" to report bugs and propose new features, helping align development priorities between teams.
- Strong team player with clear communication, comfortable in dynamic environments, and always eager to learn and improve.

D&L Consulting - Software Engineer

Jun 2021 - Nov 2021

- Worked with JavaScript and the Python Django framework on web development projects.
- Independently developed and refactored a custom extension to improve functionality.
- Supported the team by assisting with various development tasks and contributing to shared codebases.
