

Daniel Bar – Nur

Back-End Developer

0524796556 | danielbarnur10@gmail.com | [GitHub](#) | [LinkedIn](#) | [Website](#)

Profile

Back-End developer with experience in .NET. Looking for a full-stack role.

Work Experience

Pango, Full Stack Developer

Nov 2021 – Jan 2024

- Built full-stack features and internal tools using .NET (C#), SQL Server, Angular, and AWS services (Lambda, SQS, SNS)
- Developed backend flows for billing, user registration, and real-time data systems
- Delivered reporting tools for operational teams and led technical collaboration with external partners (e.g., Moovit)
- Designed a Python-based prototype integrating MOT APIs for live bus arrival monitoring
- Contributed in Scrum teams, ensuring continuous delivery and iterative improvement

D&L Consulting - Software Engineer

Jun 2021 - Nov 2021

- Worked with JavaScript and the Python Django framework on web development projects.
- Independently developed and refactored a custom extension to improve functionality.
- Supported the team by assisting with various development tasks and contributing to shared codebases.
